Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: (i.e., **80**). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: (i.e., **35** and **36**). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct

any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As concerns claim 1, the phrase “*bind* body” is not understood.

As concerns claim 3, the phrase “first electric interface means” is improper. A more appropriate phrase may be “a first electric interfacing means”.

As concerns claim 5, the phrases “said first electric interface” and “said second electric interface” lack antecedent basis since only the “*means*” of each were previously set forth.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 6, and 8-11 are rejected under 35 U.S.C. ***102(b)*** as being anticipated by ***Domel et al 5,444,339***.

Domel sets forth a window blind comprising a headrail; a driving mechanism having power input and output devices; a blind body; a control mechanism 10 having a controller, a suspension rod, and a battery set therein (the applicant should note that the rod of the controller can be viewed as inclusive of members 30 and 42); electrical interfaces (inclusive of members 108, 110, and 112); coupling means; lead wires; control switches; and a circuit board.

Allowable Subject Matter

Claims 3-5 and 7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. **112**, second paragraph, set forth in this Office action.

The following is an examiner's statement of reasons for allowance:

As concerns **claim 3**, structural limitations pertaining to the **coupling device** of the power input device having an **electric interface means within the connecting means**; and the suspension **rod** comprising **coupling means detachably coupled** to the connecting means and having **second electric interface means**, along with the other structural limitations are neither taught nor suggested by the prior art of record.

As concerns **claim 7**, structural limitations pertaining to the **coupling portion** of the rod member being a **V-groove**; and the **retaining means** comprised of **spring strips** each having **arched protruding** portion, along with the other structural limitations are neither taught nor suggested by the prior art of record.
